PROFESSIONAL SUMMARY

Computer Science and Engineering graduate building Angular and ASP.NET Core applications, with prior IT operations and Python computer vision experience. Seeking a Full-Stack Software Engineer role to build scalable, performant, and user-centric software systems.

EDUCATION

North South University <i>BSc in Computer Science and Engineering CGPA: 3.02/4.00</i>	2025 Dhaka, Bangladesh
Mirpur Cantonment Public School and College <i>Higher Secondary Certificate (Science) GPA: 4.08/5.00</i>	2019 Dhaka, Bangladesh
Dhaka Residential Model College <i>Secondary School Certificate (Science) GPA: 5.00/5.00</i>	2016 Dhaka, Bangladesh

EXPERIENCE

Junior Executive, Broadcast and IT Star News • Resolved network, Windows, software, and device issues affecting office and live broadcast operations. • Configured IP settings and LAN access; coordinated with broadcast teams to restore service during incidents.	Feb 2026 - Jul 2026
Campus Ambassador Caretutors • Helped 200+ students navigate the tutoring platform and shared user feedback with the team.	Jan 2024 - Dec 2024
Academic Tutor Caretutors • Taught 50+ students mathematics, science, and English in person and online.	Jul 2021 - Jan 2026
Trainee Officer Mec Tech Corporation Ltd. • Prepared AutoCAD drawings and Excel reports using VLOOKUP and PivotTables.	Jan 2021 - Jul 2021

PROJECTS

Probesh - Community Accessibility Mapping Platform <i>Angular, TypeScript, ASP.NET Core Web API, EF Core, SQLite In progress</i> Github: github.com/mubtasim-fuad/probesh • Architected a full-stack accessibility mapping platform featuring searchable place listings, interactive location details, and user-driven accessibility submissions. • Built Angular place discovery, search, and filtering; connected community submissions to REST APIs and SQLite. • Implemented facility-based accessibility scores and review status for submitted place information.	2026 - Present
Pharmacy Management SaaS <i>Angular, C#, ASP.NET Core Web API, SQL In progress</i> Github: github.com/mubtasim-fuad/pharmacy-management-saas • Developing inventory, sales, and purchasing workflows for pharmacies in Bangladesh. • Designing API and data structures for medicines, transactions, and stock; reporting and alerts are planned • Engineered intuitive frontend dashboards in Angular with state management and real-time inventory query filtering.	2026 - Present
Vision-Park- Real Time Empty Parking Spot Detection <i>Python, OpenCV, Scikit-learn, NumPy Senior design project</i> Github: github.com/mubtasim-fuad/VisionPark-Real-Time-Empty-Spot-Identification • Built an SVM pipeline to classify parking spaces in video and overlay available-space counts. • Used mask-based connected components to identify spaces and calculate the nearest free spot.	2025
Bias Behind the Box - FairFace Model Evaluation <i>Python, VGG16, FairFace</i> • Evaluated classification across seven FairFace groups using per-class accuracy and confusion matrices.	2025

TECHNICAL SKILLS

Programming Languages: C#, Java, TypeScript, JavaScript, Python, SQL, HTML, CSS
Frameworks and Data: Angular, ASP.NET Core Web API, EF Core, REST APIs, SQLite; SQL Server fundamentals
Tools and ML: Git, GitHub, VS Code, LaTeX, OpenCV, Scikit-learn, NumPy, PyTorch, Computer Vision

ADDITIONAL INFORMATION

Languages: Bengali (Native), English (Fluent), Hindi (Conversational)
Interests: Artificial Intelligence, Quantum Computing, NLP, Creative Writing, Prompt Engineering, Photography
